***+0,4%** at iso-scope*

** applicable to tire-related segments*

Polymer Composite Solutions: Organic growth in all categories but Conveyors, successfully integrating newly acquired companies

9M 2026 Revenue by Product Category

Conveyors

Q3 sequentially better but still declining

Challenging economic environment and customer caution (e.g. inventory management)

Sealing

Strong demand for hydraulic cylinders, e.g. in infrastructure & construction

Volatile oil & gas markets

Flexitallic

Coated fabrics & films

Growth in diversified end-markets such as supercars and aerospace

TEXTECH Cooley Group

Belting & components

Healthy industrial end-markets, notably logistics and energy

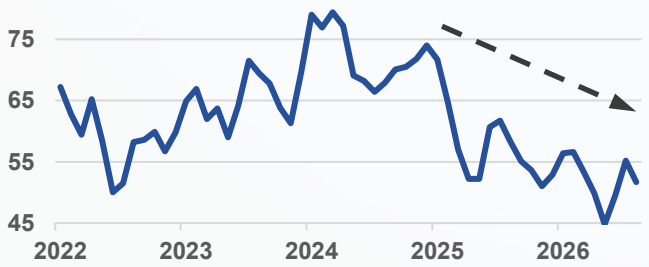

Soft demand in OE-driven agricultural applications

ⓘ Engineered polymers & Hoses categories not disclosed separately, as they currently account for a limited portion of PCS business

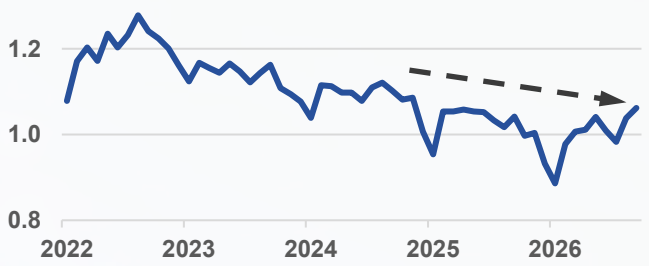

North America: Resilient performance in a challenging environment

An overall sluggish economy

Consumer Sentiment

Freight Index

K Shaped Economy

GDP growth largely driven by Tech

Q3 Sales growing both Volume & Mix

Replacement sales

- ✓ PC: MICHELIN brand overperforming
- ✓ Mining gaining share
- ✓ Truck: Group gaining ground on YTD basis, on a weak market

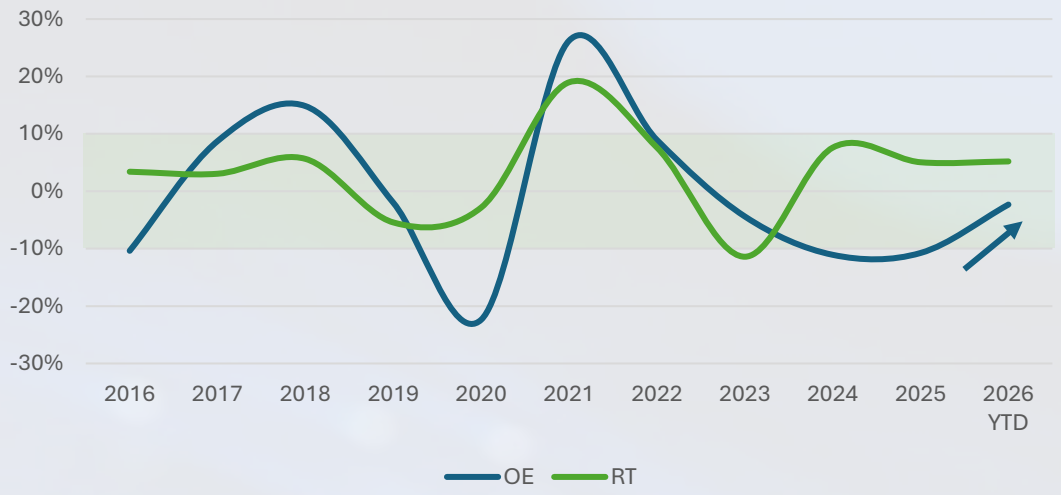

Original Equipment sales

- ✓ PC: low market and negative mix of brands & models
- ✓ Truck: depressed H1, Q3 market upswing, stabilized commercial positions
- ✓ AG market stuck in a downcycle

WW Truck: Michelin capitalizing on OE recovery but penalized by weaker-than-expected American markets

OE market recovering as expected

Truck & Bus tire markets (in units, YoY evolution EUR, NA & AMS)

Market outlook	Q4-26	H1-27
OE	↗	→
RT	→	→

Sales trends reversing in Q3

OE Recovery

H1 | Sales down double digit
Mostly driven by a depressed demand in the Americas

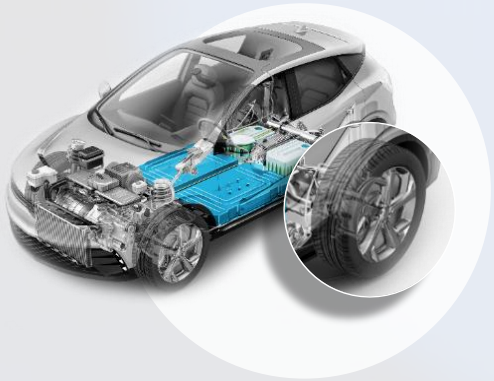

Q3 | Sales up mid-single digit
Market recovering (still low in absolute terms), market shares stabilized in North America

RT Decline

H1 | Sales up low-single digit
Stable positions on contrasted sell-in markets: sharply up in Europe and strongly down in North America

Q3 | Sales down mid-single digit
Slowdown in Europe, continued soft demand in the Americas

Electrification: Accelerating in China and Europe, a powerful tailwind for Michelin

xEV production: China & Europe leading

(BEV+PHEV+MHEV+FHEV, % of vehicle production – 2026 E) [1]

	% of WW prod.[1]	xEV share
China	34%	65%
Europe	16%	64%
North America	16%	25%
ROW	34%	47%

MICHELIN

(1) Carried out with the support of ADEME

(2) WhiteCycle is a Michelin-led EU project to recycle technical textiles into raw materials.

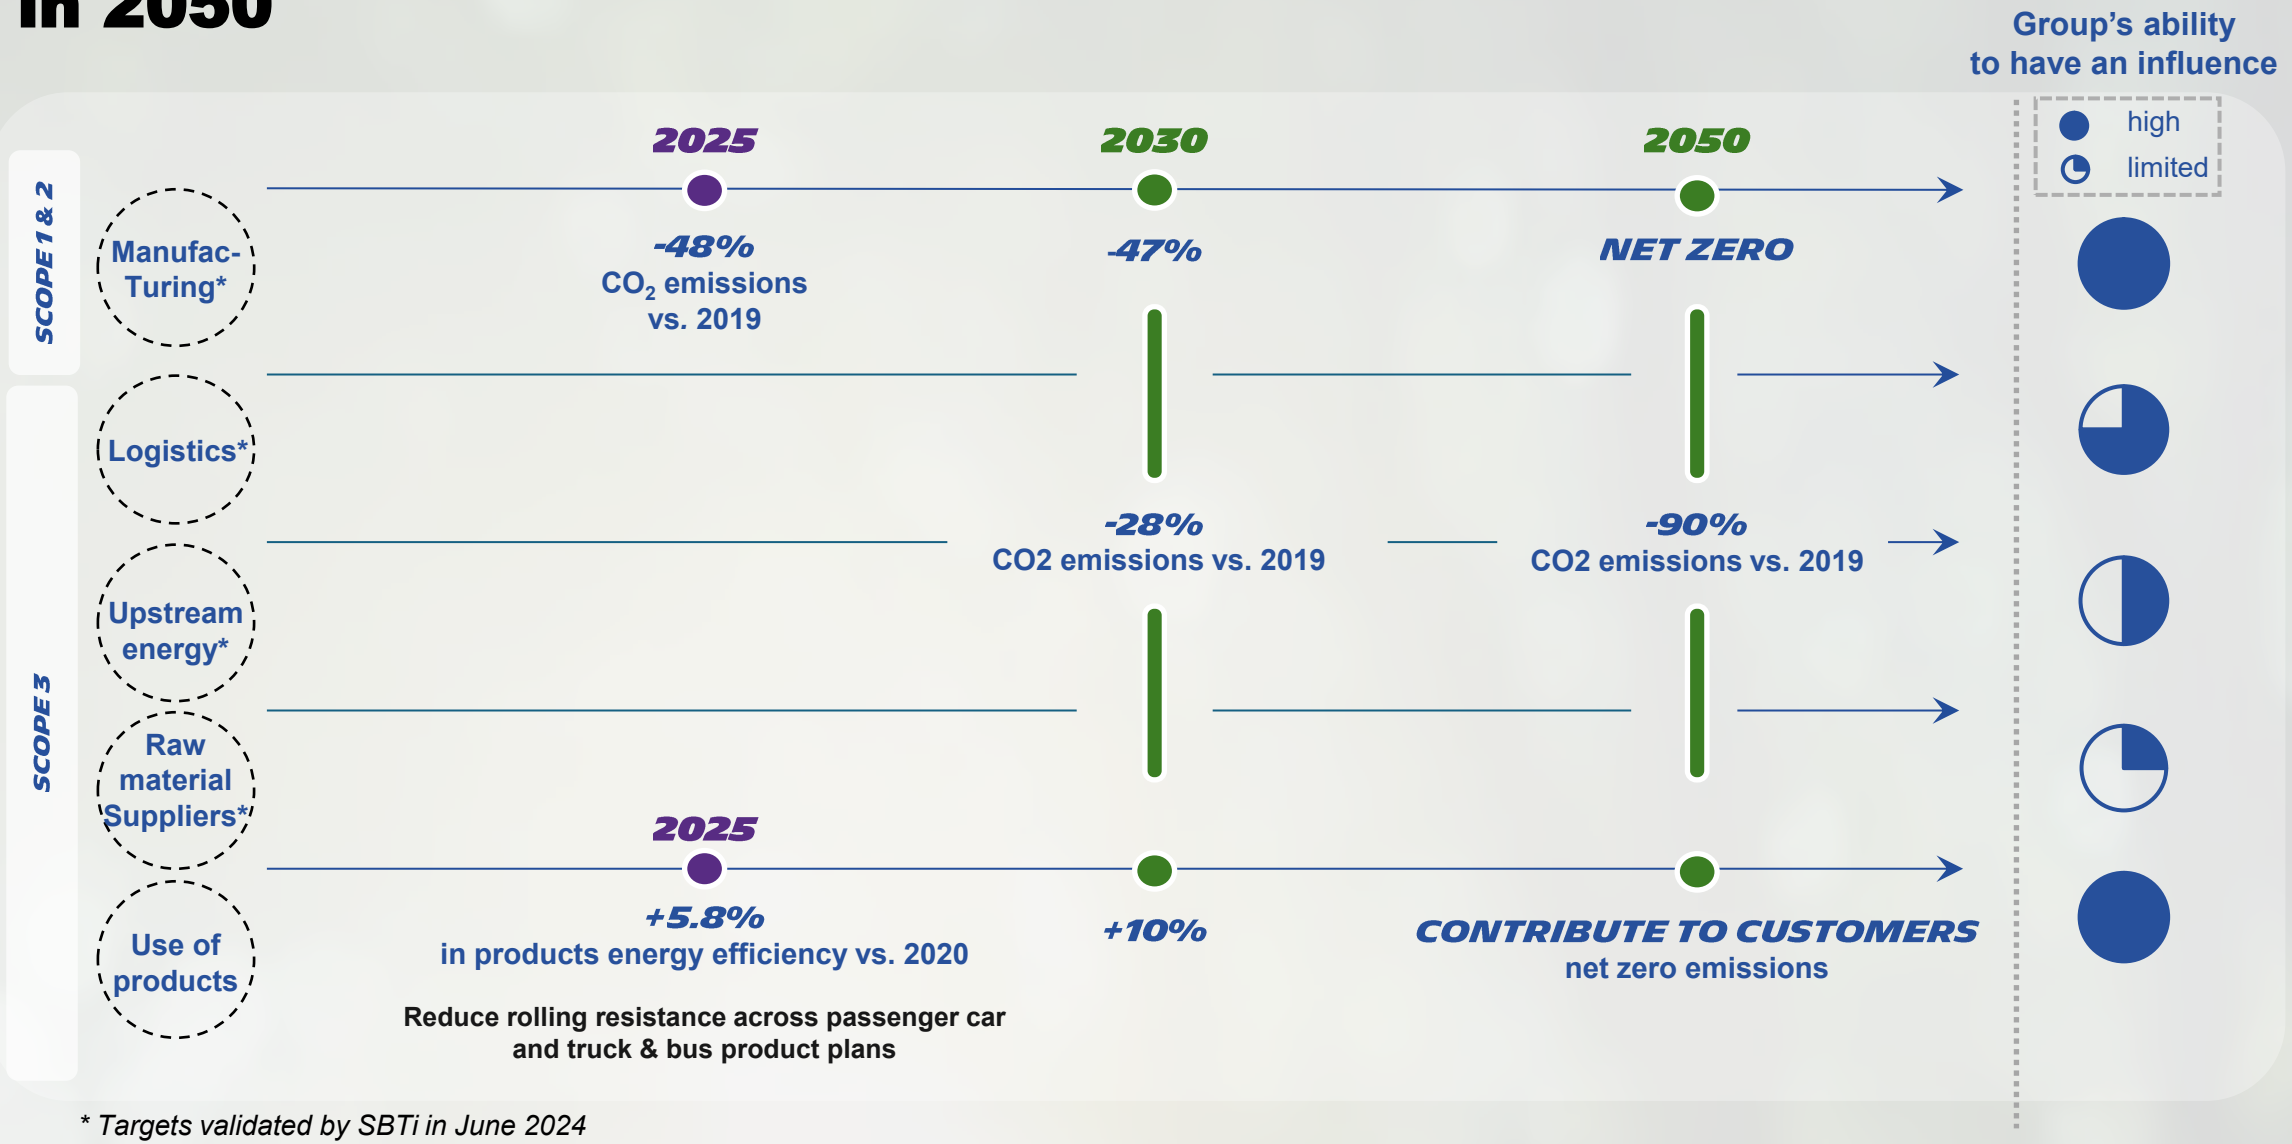

Water resources: Working toward fair and sustainable water use

	2019	2024	2025	2030 Ambition
Water withdrawals * 	REFERENCE YEAR	-15%	-22%	-33%

- **Confident** in Group's ability to **reach 2030 ambition**
- **Robust**, financially supported **program**:
  - ✓ Encouraging **water-saving projects**, particularly in the most at-risk regions ("internal water price")
  - ✓ Deploying concrete **roadmap on each site**
  - ✓ Deploying **good practices** on main topics**:** water leaks, steam consumption and evaporation, water-efficient systems, monitoring of water usage
  - ✓ Raising **awareness** across the organization

** Water withdrawals weighted for each site's water stress coefficient, more details in p.231 of the 2025 Universal Registration Document*

2030 environmental ambition: On track to reach net-zero emissions in 2050

* *Targets validated by SBTi in June 2024*

Results Ambitions

TRWP: Michelin driving innovation and advancing knowledge in the tire industry

Scientific studies to measure the environmental impact of TRWP(1)

AIR

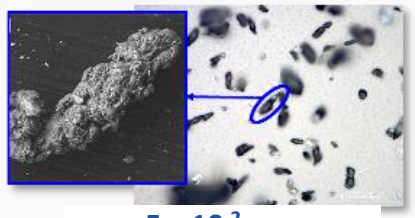

Studies confirm that TRWP account for less than 1% of particulate matter pollution (PM10)

WATER

Studies suggest that most TRWP do not reach estuaries

TRWP

5×10^{-2} mm

Very different in density and composition than usual microplastics

2024

- ✓ **Euro 7** regulation introduced the first need for tire wear abrasion limits
- ✓ Tire manufacturers through USTMA, including Michelin, submitted Preliminary **Alternatives Analysis** to the DTSC (2)
- ✓ Michelin continued developing methodologies and tools to better understand TRWP. **SAMPLE**, a research tool to measure emitted particles was recognized with 2 awards

2025

- ✓ 2nd **ADAC study** published that confirms Michelin leadership in abrasion compared to competitors
- ✓ The average of all competitors tested by ADAC **emits 38% more particles than Michelin**

DOWNLOAD ADAC study

Tyre wear particles in the environment (June 2025)

2026

- ✓ **Euro 7** regulation **adopted** by the European Commission **in June 2026, for passenger car tires**
- ✓ **Michelin is satisfied with the test method and ambitious threshold**
- ✓ 2nd stage of **Alternative analysis** of 6PPD postponed by DTSC to 2029. Michelin continues to participate
- ✓ Michelin also continues other research initiatives (e.g. BioDLab)

(1) TRWP – Tire & road wear particles – are tiny debris generated by abrasion from a tire's contact with the road surface. This abrasion is caused by the tire's grip and keeps the tire safely on the road.

(2) USTMA = US Tire Manufacturing Association ; DTSC = California Department of Toxic Substances Control

Strong commitment to reduce impact of operations on biodiversity and ecosystems

	2024	2025	2030
RESEARCH & DEVELOPMENT			
Life Cycle Analysis incl. biodiversity criteria from best methods	**100%** of new products	services: **PILOT**	**100%** of new ranges marketed
RAW MATERIALS			
Natural rubber used by the Group assessed "deforestation-free" (1) Direct operations and suppliers	**98%** (2)	**98%** (2)	**100%** (3) of the volume used
Reducing pesticide use in rubber cultivation (4) Direct operations and joint ventures	**-52%**	**-69%**	**-70%** vs. 2019
Evaluation of raw material supplier policies & practices (5)	Approach defined	**PILOT**	**80%** of suppliers
MANUFACTURING AND RESEARCH FACILITIES			
Biodiversity plan adapted to local issues	**44** sites	**57** sites	**100%** of sites
No phytosanitary products to maintain outdoor spaces	**45** sites	**61** sites	**100%** of sites

(1) Criteria in accordance with the EUDR - European Union Deforestation-free Regulation - or other evidence of deforestation absence | (2) Excluding some Polymer Composite Solutions activities | (3) Excluding changes in the Group's scope | (4) Per hectare ; base year 2019 | (5) Other than natural rubber; impacts identified through Life Cycle Analyses (LCA)

Sustainable natural rubber by Michelin: Driving progress across a complex and fragmented value chain

NATURAL RUBBER SNAPSHOT

~90% of supply from **1.5 M farmers** with an average of **2 Ha. farm size**

Up to 7 intermediaries in Asia

~100 direct suppliers

Global footprint:
🌎 Brazil, Indonesia, Thailand, West Africa
🌿 85,000 ha plantations | 🏭 15 plants
⚙️ 500,000 t/year

Sustainability:
Founding member of GPSNR (Global Platform for Sustainable Natural Rubber)

ACCELERATING SUSTAINABILITY ACROSS THE INDUSTRY BY 2025

- **Dedicated roadmap** focused on zero deforestation, human rights, and farmer empowerment
- **Geolocation of millions of rubber tree plots** with suppliers to meet EU deforestation-free rules by Dec. 30, 2025

EXTENDING ASSESSMENTS OF PRACTICES ACROSS THE VALUE CHAIN: 2025 ACHIEVEMENTS

- **Direct suppliers:** 98% of spend assessed via EcoVadis, 94% rated ESG mature.
- **Indirect suppliers:** RubberWay-Risk® covers **93%** of Michelin's supply volume.

IMPACTFUL PROJECTS TO IMPROVE SKILLS, LIVELIHOOD AND SUSTAINABILITY PERFORMANCE

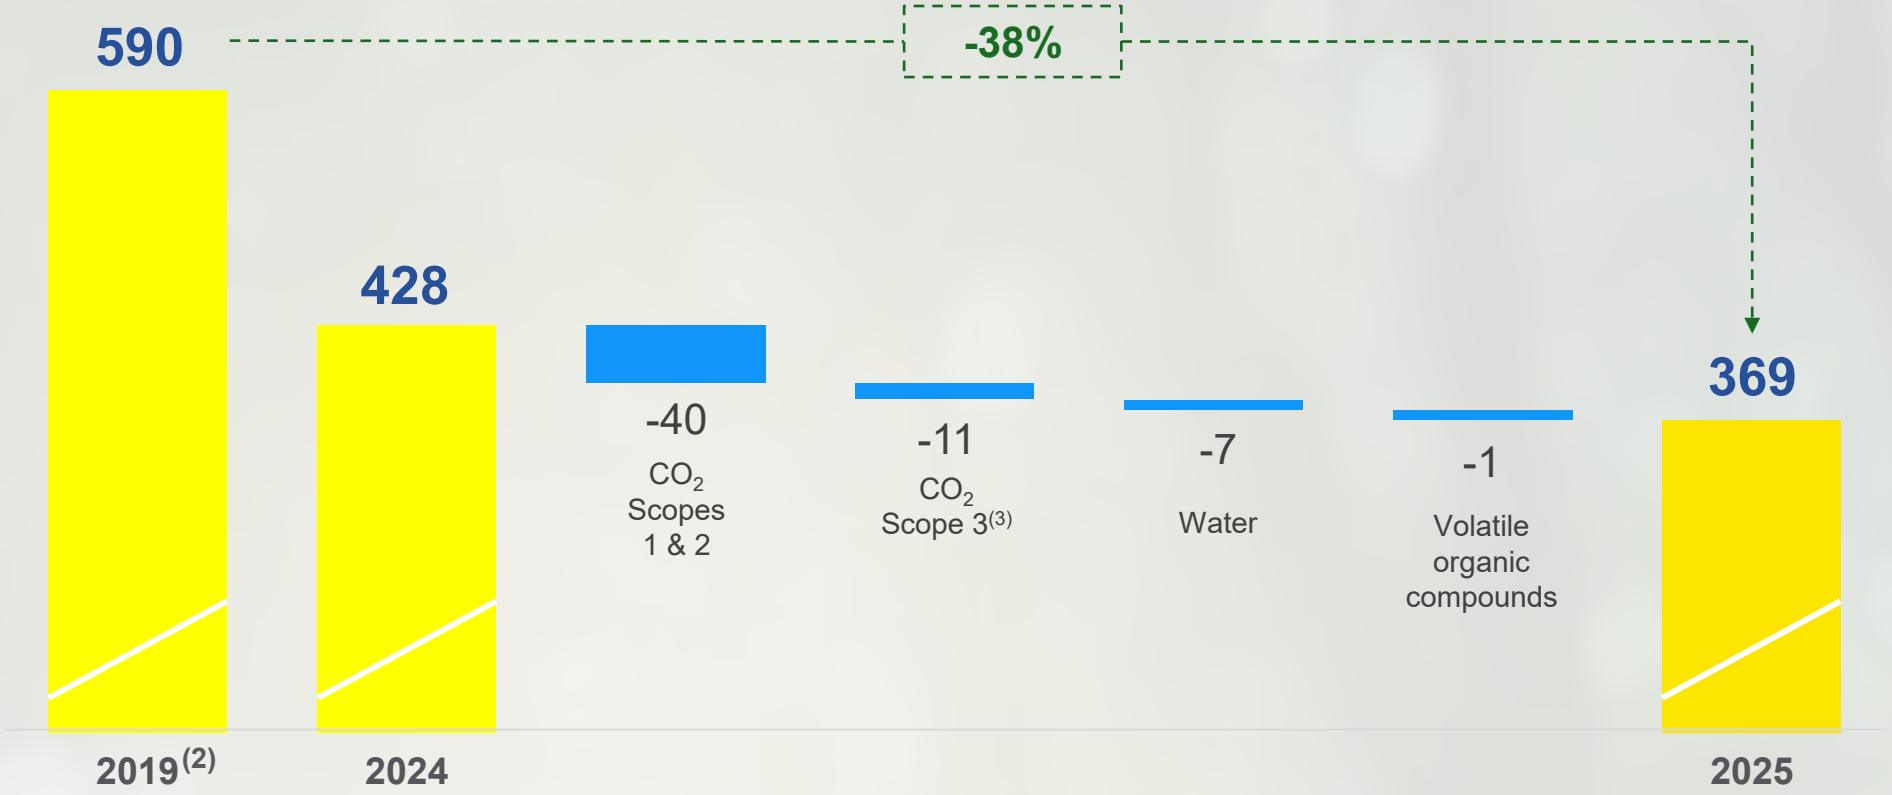

- Various projects support farmers and their families in Brazil, Indonesia, Sri Lanka, Thailand and West Africa, giving impactful results.

	2022	2024	2025	2030
Number of smallholder farmers whose working conditions and/or livelihoods have improved	*467*	*6,783*	*10,456*	*30,000*

Externalities: Almost 60m€ reduction in 2025, over 220m€ since 2019

Externalities costs evolution: CO_2 emissions, VOC(1) emissions and water withdrawals

(€ millions)

(1) Volatile Organic Compounds
(2) Calculated with a CO2 cost per ton of €120
(3) Inbound and outbound transportation and distribution of natural rubber, semi-finished products and finished product

Climate strategy structured around transition and adaptation plans, towards net-zero emissions by 2050

SCIENCE BASED TARGETS 1.5°C

STRUCTURED AROUND 2 AXES

A TRANSITION plan
to decarbonize all value-chain activities (Scopes 1, 2 & 3) and to accelerate the shift toward a low-carbon economy.

An ADAPTATION plan
responding to physical impacts of climate change

BASED ON 3 PRINCIPLES

Achieve net-zero emissions (scopes 1, 2 and 3 essential) by 2050
by meeting our 2030 reduction commitments

Identify risks and opportunities
based on climate change scenarios

Transparently disclose information
to our external stakeholders

Fostering social and societal cohesion through ambitious initiatives

‘Living wage’ for every Group employee

- **‘Global Living Wage Employer’** certified by Fair Wage Network
- Enabling each employee to provide for his/her **family’s essential needs**
- For **all Group employees** since Jan. 2024

Lifelong learning approach

- An average of **44 hours of training** per employee completed in 2025
- In average,**6 training offers used by each employee per year**
- **Online training modules** use increased by **82%** in 2025 vs 2024

Michelin One Care Program, a universal social protection floor

- Providing **time to welcome a new child**
- **Family protection** in case of employee’s death
- Ensuring employees and their families can **access a health program**
- For **all Group employees** since Jan.2025

Diversity, Equity, Inclusion: Further progress in gender balance and acceptance of diversity with a new policy supporting the dynamic

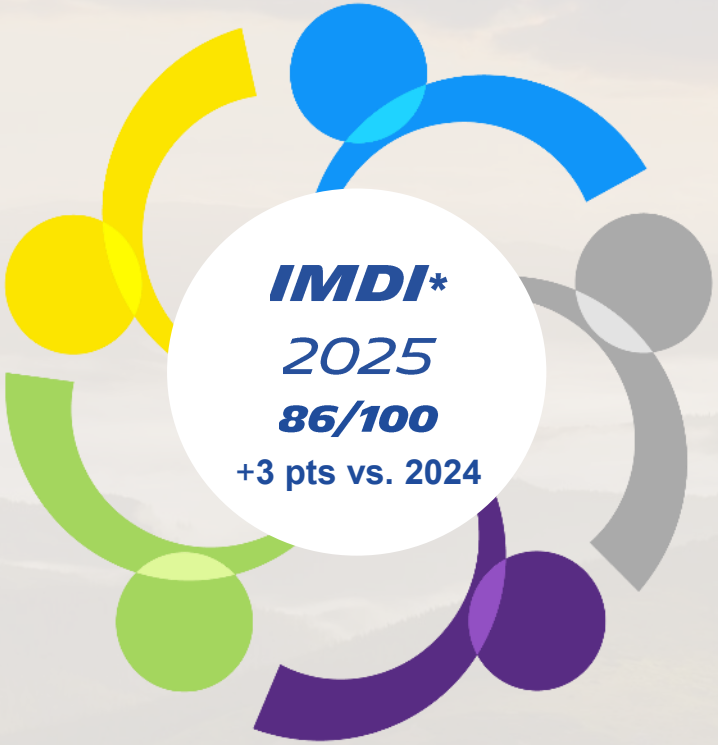

Around 5 key areas

DISABILITY

Michelin promotes access to the workplace for people with disabilities and facilitates their retention within the company.

SOCIAL PROMOTION OF OPERATORS

Michelin pays particular attention to the internal promotion of manufacturing operators.

INCLUSION AND EQUITY

Allowing everyone to be valued, embraced, and treated fairly, regardless of their differences.

GENDER BALANCE

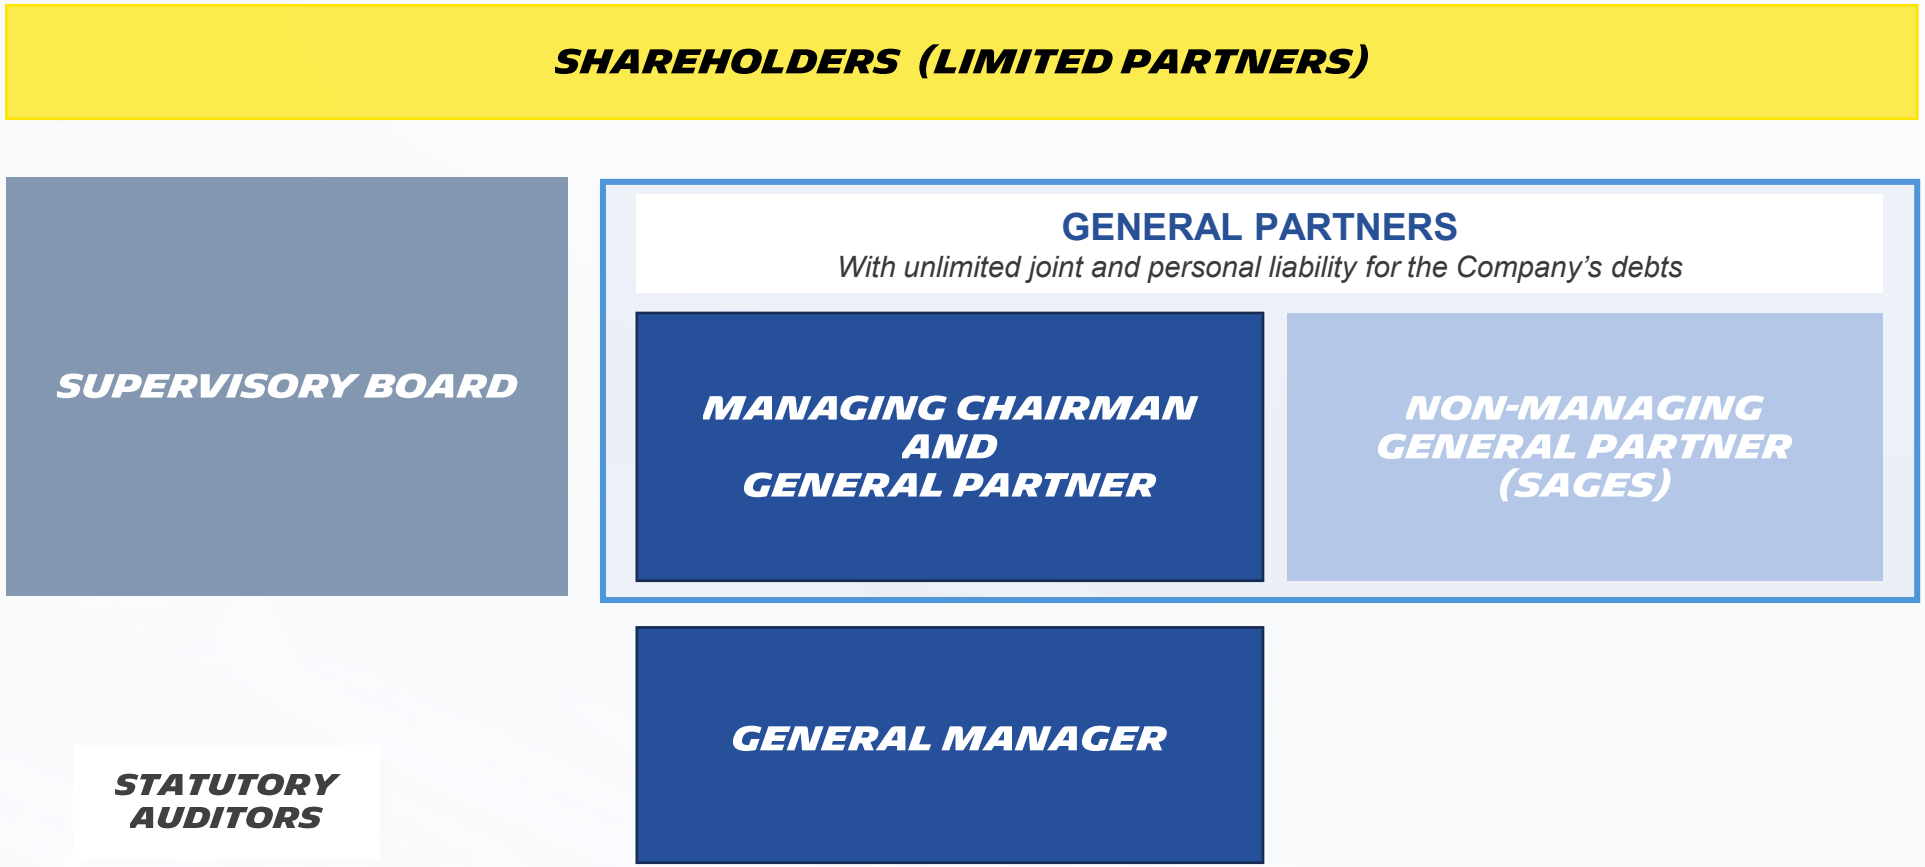

Significantly increasing the proportion of women among Group executives and in management positions.

MULTINATIONALITY OF TOP MANAGEMENT

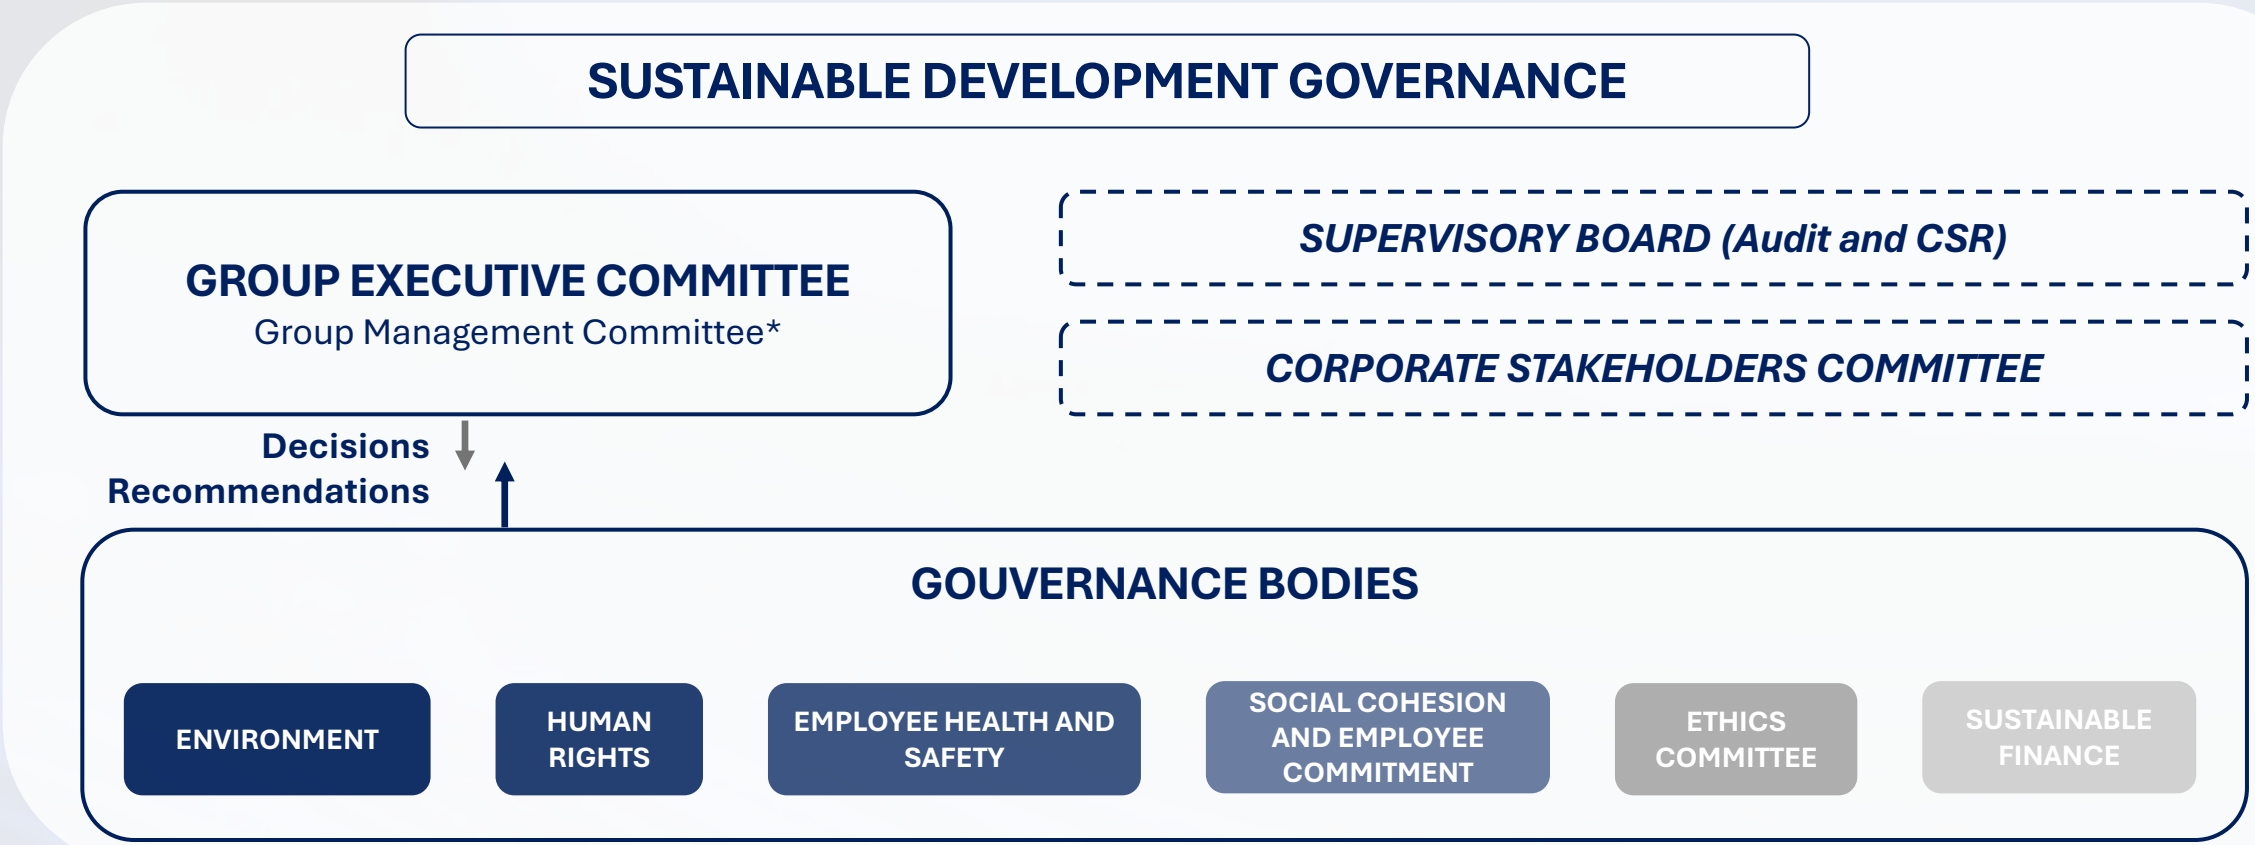

Most nationalities of the countries in which the Group operates are represented among the 100 top executives of the company.

** IMDI : index evolution to better reflect on-the-ground actions*

Michelin governance pillars: Clear segregation of management and supervisory powers

ESG awareness and oversight are fully embodied in Michelin's governance structure

** Group Management Committee = Group Executive Committee + The Following Departments: Legal, Purchasing, Finance, Information Systems, Internal Control, Audit & Quality, Strategy, Supply Chain, Corporate Business Services, China And The North America Regions.*

Glossary

FREE CASH FLOW BEFORE M&A

Free cash flow before dividend payments and financing transactions, corresponds to net cash from operating activities less net cash used in investing activities, including JV financing, adjusted for net cash-flows relating to cash management financial assets and borrowing collaterals. M&A-related cash-flows and repayment of IFRS 16 debt are not included.

ROCE

Return on capital employed: Net operating profit after tax (NOPAT), calculated at a standard tax rate corresponding to the Group's average effective tax rate; divided by average economic assets employed during the year, i.e., all of the Group’s intangible assets, property, plant and equipment, loans and deposits, investments in equity-accounted companies, and net working capital requirement.

NON-TIRE SALES

Sales from the Connected Solutions (excluding TaaS and Distribution), Polymer Composite Solutions businesses, Lifestyle, excluding joint ventures

IMDI

Composite indicator, covering mixity (gender), disability, perception of equity and inclusion and social promotion of collaborators.

TRIR

Number of work-related injuries per 500 full-time workers during a one-year period

TRWP

Tire and Road Wear Particles are generated by the friction between the tire and the road surface and are influenced by a variety of factors. These particles are composed of around 50% elastomer fragments from the tire and 50% minerals and road dust and their size ranges from 80 and 100 microns.

RENEWABLE OR RECYCLED MATERIALS

See definition on p.254 of the 2025 Universal Registration Document

NPS

Net Promoter Score, see definition p.282 of the 2025 Universal Registration Document

Disclaimer

This presentation is not an offer to purchase or a solicitation to recommend the purchase of Michelin shares. To obtain more detailed information on Michelin, please consult the documents filed in France with *Autorité des marchés financiers*, which are also available from the Michelin.com website.

This presentation may contain a number of forward-looking statements. Although the Company believes that these statements are based on reasonable assumptions as at the time of publishing this document, they are by nature subject to risks and contingencies liable to translate into a difference between actual data and the forecasts made or inferred by these statements.
